INNOVATIONS

Experience Harmony: IoT

Gartner, Inc. forecasts that the enterprise and automotive Internet of Things (IoT) market will grow to 5.8 billion endpoints in 2020, a 21% increase from 2019.

Experience Harmony: IoT

“Overall, end users will need to prepare to address an environment where the business units will increasingly buy IoT-enabled assets without policies for support, data ownership or integration into existing business applications,”

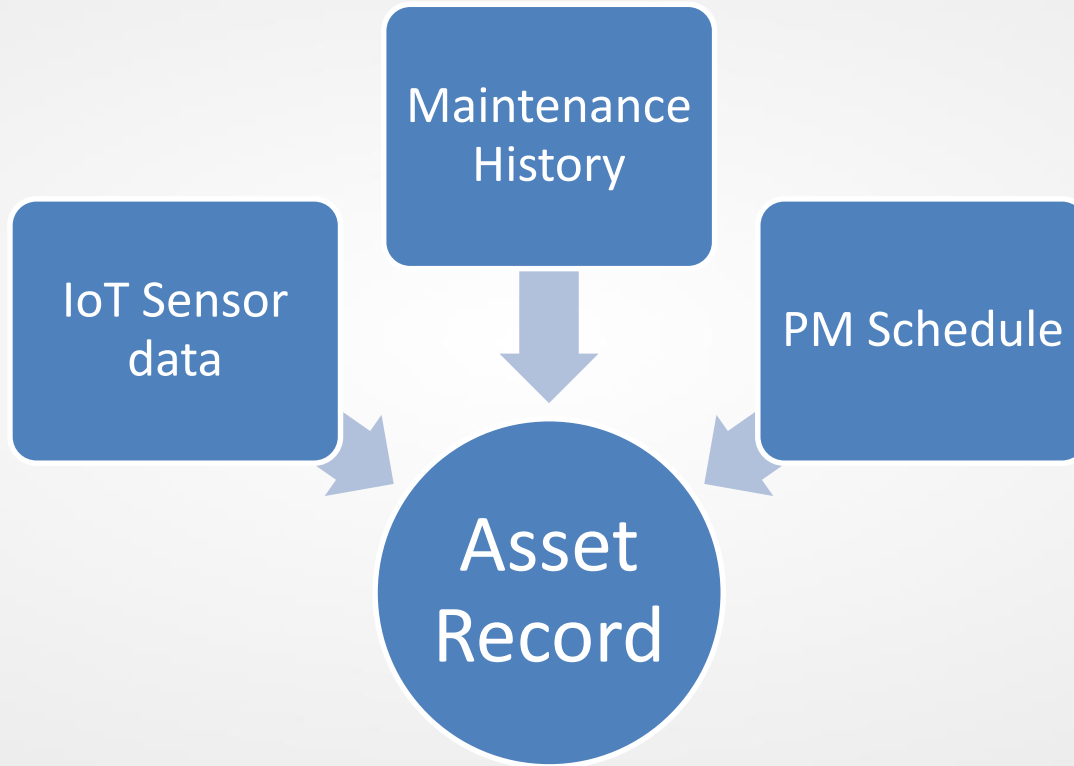

- Alfonso Velosa (Research vice president at Gartner)

Experience Harmony: IoT

True or False?

Companies can optimize their assets by hiring data scientists and equipping them with an analytics platform; no industrial domain knowledge necessary

CHAMPS IoT Project

- Discovery
 - Objectives (Analysis and Actions)
Define business/use case.
 - Scope (Data: Sources, Types, Volume)
Determine reach of the project.
