Overview

Using CHAMPS Work Request your users will submit service / maintenance requests directly through your corporate intranet or over the Internet. Users access Work Request through a standard browser with no application software on the client work station. User Id and password protection are available and the users are provided current request status via email.

Once a work request has been generated, the work order component provides planned work review

Features

Important features of the CHAMPS Work Request module include:

- 24 Hour service / maintenance request submission
- Status updates via email
